LAMILUX at digitalBAU 2022

DIGITALISATION.INNOVATION.LAMILUX - Building goes digital

LAMILUX, the manufacturer of skylights, presents itself at digitalBAU in Cologne as an innovative company that takes its customers along on a digital journey. Included in the equipment: the multiple award-winning LAMILUX BIM and product configurator as well as the LAMILUX World - a virtual reality experience that provides unique insights into the world of skylights.

BIM by LAMILUX – Shaping the future

At digitalBAU 2020, LAMILUX presented the pilot, but since last year the in-house product configurator has been ready and has already received several awards. Since then, architects, planners or roofers have been able to configure skylights themselves with this service tool - and download variant-specific data sheets, drawings, CAD data and BIM models. See for yourself at digitalBAU, where you can find the LAMILUX product configurator which covers the entire range of LAMILUX upstand products.

Immerse yourself into the LAMILUX product world

Immerse yourself into the LAMILUX World, a virtual platform in which skylights are presented digitally in 3D view via the browser. Through the LAMILUX World, skylights can be experienced in various usage and installation scenarios. The virtual 360° world of LAMILUX is a digital offer for a completely new product

LAMILUX Heinrich Strunz Group, Rehau

Continuous rooflights, glass roofs or rooflights: the LAMILUX Heinrich Strunz Group is one of the leading manufacturers of skylights in Europe. The visually appealing products ensure efficient use of natural daylight in a wide variety of buildings. In addition, special smoke and heat extraction systems provide safety in case of fire and are therefore essential components of fire protection concepts. Furthermore, the medium-sized family business founded in 1909 is one of the world's largest producers of carbon and glass fibre reinforced plastics. These special composite materials are used in commercial vehicles and above all impress with their stability, lightweight construction and impact resistance in roof, wall and floor coverings as well as their light weight. The company based in Rehau currently employs more than 1250 people and had a turnover of around 335 million euros in 2021.
