

Solemar, Bad Dürkheim (Germany)

Short Info

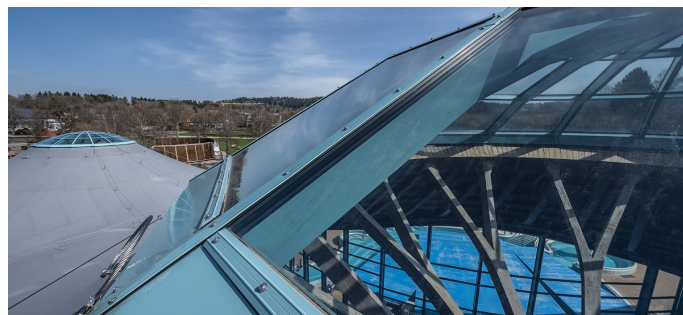

City / Country:	Bad Dürkheim, Germany
Year:	2018
Object type:	Brine Thermal Bath
Solutions:	LAMILUX Glass Roof PR60

After the renovation of the skylights at the Solemar thermal bath in Bad Dürkheim, the swimming area shines and is flooded with plenty of daylight thanks to our LAMILUX Glass Roof PR60. A total of five old glass constructions with different dimensions were replaced by our design. The new glass roofs were self-supporting, measuring up to 6.5 m in diameter. Made of aluminium profiles from the LAMILUX Glass Roof PR60 series, the finished skylight design featured 18 segments to give a circular glass domes appearance. The elements were delivered as maximum transportable pieces and assembled on site. A crane was used to assemble the structures on the roof, which pulled the completely finished elements up onto the roof. At the end of the glass roof renovation, the management of the swimming pool expressed their thanks for the competent and high-quality work.
