LAMILUX Rooflight F100

Fronius, Neuhof

Essential info

Place / country:	Neuhof, Germany
Year:	2018
Building type:	Administration and production building
Solutions:	Rooflight F100 Continuous Rooflight B Glass Roof PR60 Glass Skylight F100

For the new construction of the company headquarter Fronius in Germany, it was very important for the client and the architect Staubach & Partner to use innovative and high-quality products. In cooperation with the company Heurich from Neuhof, two LAMILUX Glass Roofs PR60 and many LAMILUX Glass Skylights F100 were installed on the administration building. In addition, LAMILUX Continuous Rooflights B with Safety Stripes and Rooflights F100 with Safety Net in the glazing were installed on the production building. These offer permanent fall-through protection without the conventional grids, which require extensive cleaning. The fan blades, which are installed in the Glass Roof PR60 and in the Continuous Rooflight B, can not only be used for daily ventilation, but also trigger automatically in case of fire, so that the smoke can escape from the building.
